

## **TECHNICAL DATA**

**FLOW PRESSURE TEMPERATURE LEVEL** 

# **LMK 331**

### Screw-In Transmitter

Ceramic Sensor

accuracy according to IEC 60770: 0.5 % FSO

#### Nominal pressure

from 0 ... 400 mbar up to 0 ... 60 bar

#### **Output signals**

2-wire: 4 ... 20 mA 3-wire: 0 ... 20 mA / 0 ... 10 V others on request

#### Special characteristics

- pressure port G 3/4" flush for pasty and impuritied media
- pressure port PVDF for aggressive media

#### **Optional versions**

- IS-version (only for 4 ... 20mA / 2-wire): Ex ia = intrinsically safe for gases and dusts
- SIL 2 application according to IEC 61508 / IEC 61511
- customer specific versions

The screw-in transmitter LMK 331 has been especially designed for level and process measurement and is suitable for pressure measurement of liquids, oils and gases. Usage in more viscous or polluted media is possible because of the semiflush pressure sensor.

For the usage in aggressive media we recommended the version with PVDF pressure port. Additional features like e.g. an intrinsically safe version or a functionally safe version (SIL 2) complete the range of possibilities.

#### Preferred areas of use are

Plant and Machine Engineering

Energy Industry

Environmental Engineering (water - sewage - recycling)

Medical Technology

## LMK 331
